

## LANDFILL GAS AND ENERGY TECHNICIAN - Crane Mountain Landfill

---

### Answer two questions:

1. Do you have a demonstratable passion for 'Green Energy'?
2. Do you have background in one of Electrical, Mechanical, Biological and Gas Technology?

**If you answered yes to both these questions then we are looking for you! Read on...**

### The Fundy Region Solid Waste Commission...

The Fundy Region Solid Waste Commission (FRSWC) is responsible for solid waste disposal and diversion in the Saint John area, including Crane Mountain Landfill and compost/recycling programs. The Commission is a non-profit organization governed by representatives of municipalities and local service districts.

### The Position...

Reporting to the Operations Supervisor, we are looking for a full time **Landfill Gas and Energy Technician** to be responsible for a 35 well landfill gas field, a flare and our new 1 MW generating station at the Crane Mountain Landfill in Saint John, NB. The position requires some supervision of a direct report, but will primarily be a hands-on role ranging from field work in varying climate conditions to detailed report generation and decision making for the future.

### The Opportunity...

Landfill gas (LFG) technology is a relatively new field that has become a necessity of the solid waste industry. The FRSWC will be expanding the well field every three years, increasing capacity and opportunity for more electrical production and carbon credits. We will also explore opportunities for heat/hot water recovery from the system and excess gas capacity for direct-use projects that have become common in the industry including greenhouses and biomass dryers to support an eco-park resource strategy.

### The Qualifications...

This new position is considered entry level management. The range of knowledge required is broad enough, and the technology young enough, that we expect candidates to only have the background required in at least one area of Electrical, Mechanical, Biological and Gas Technology, but the candidate must have the ability and desire to learn and apply the others. Our staff, partners and outside experts will lead the candidate through the learning curve by providing training and support throughout the career of the candidate. Core requirements will include competency strong in teamwork, work ethic, initiative, leadership, attention to detail, plus ability to 'think outside the box'. Ability to work energetically and outdoors in a physical and sometimes harsh environment is essential.

### The Proposition...

This position is full time in the range of \$45,000 - \$55,000 annually with an excellent benefits package. Work life balance is paramount; however, the role will also require off peak maintenance work and 24 hour call in capability; remote trouble shooting technology and a vehicle will be made available.

To apply, please send a resume and cover letter, including "Landfill Gas and Energy Technician" in the subject/addressee line via one of the following methods:

Fax: (506) 738-1207  
E-mail: [hotline@fundyrecycles.com](mailto:hotline@fundyrecycles.com)  
Mail: Fundy Region Solid Waste Commission  
PO Box 3032  
Grand Bay-Westfield NB E5K 4V3

No telephone inquiries please.

All applications must be **received** by Friday, March 12, 2010 by 12:00 p.m.

*We thank all candidates for their interest; however, only those selected for an interview will be contacted. We are an equal opportunity employer.*
